## FREQUENTLY ASKED QUESTIONS (FAQs)

Ques 1: How to enrich image resolution on word to PDF conversion?

Ans: Convert DOC file into high res. PDF by performing the below steps -

- 1) Open the file in MS office
- 2) Press the option for "Print" the file.
- 3) Choose the printer "Adobe PDF"
- 4) Adjust the Adobe PDF Settings:

File Home Inser	ert Page Layout Formulas Data Review View Acrobat

6) The fonts should be adjusted as follows:

Standard General Images Fonts	Adobe Color Settings Settings File: None				
Color Advanced Standards	Color Management Policies				
Standards	Leave Color Unchanged				
	Document Rendering Intent: Preserve				
	Working Spaces				
	<u>G</u> ray: Gray Gamma 2.2				
	BGB: sRGB IEC61966-2.1				
	CMYK: U.S. Web Coated (SWOP) v2				
	Preserve CMYK values for calibrated CMYK color spaces				
	Device-Dependent Data				
	Preserve under color removal and black generation				
	When transfer functions are found: Apply				
	Preserve halftone information				

8) Check quality of halftone figure and accordingly use blur/un sharp mask.

Ques 2: How to embed fonts in word template (.docm)?

7) The color settings should be as shown.

Ans: Perform below mentioned steps to embed fonts in word template -

1) Click the round Office logo in the upper-left corner of the Word 2007 window.

Doen Save	Recent Documents  AddTt9_Supplementary traves_Template.docm  Copy of MATP9_Supplementary traves_Template.docm  AddTt9_Supplementary trave_Template.doc  AddTt9_Supplementary traves_Template.doc  D_probleme.docs  C_d_stars		er Aad-bre Acrobet http://de.aubit.com/ aption 11 Calentul - 11 Heading 1 Skrei	Repts

6) Place a check in the box labeled "Do not embed common system fonts" to skip embedding fonts that the recipient is likely to have on their computer. If you know that the recipient is running a different operating system, leave this box unchecked.

7) Click "OK," then click the floppy disk icon in the upper-left corner of the screen or press "F12" to save your document.

Ques 3: How to insert/position the figures in the template?

**Ans:** In order to insert/position the figures in the template, below mentioned steps to be performed -

1) Click on "Insert" menu followed by "Picture" sub-menu.

2) Select the required image from the folder and click on insert.

Look in:	Dew Folder	💌 듲 🗈 🔍 🗙 💾 🎞 - Tools -
History Ny Documents Desktop	Figure_5.tif	lounteed of the second
Favorites		SSRIs Metabo
My Network	File <u>n</u> ame:	▼ (Inse

3) Selected figure would be inserted at the current cursor location.

- 4) If the problem still persists, following process to be performed
  - a. Author to add the remarks next to the figure location in the article.
  - b. The figures to be provided as standalone files so that the same can be inserted at production end.
  - c. In case figure size is not per the layout of the article then the author can leave such figures as is. The figures would then be resized per the requirement.

Ques 4: How to check for the figure quality?

Ans: Good quality figure, should qualify the below criteria -

- a. The resolution should be greater than 240 ppi. This information shall reflect in the query log sheet provided by DA's.
- b. In addition to the resolution, there are certain visual factors which qualifies the figure
  - a) Text available within the figure should be readable.
  - b) Straight lines available within the figure should not be crooked (distorted).
  - c) The image should be very clear and sharp. It should not be fuzziness.
  - d) The image should be bright and not dull (diminished).

Ques 5: How to check for the equation quality?

**Ans:** The equations embedded through equation editor will have to be checked only for the missing fonts.

If the equations are embedded as an image, it has to qualify the below criteria -

- a. Text available within the equation embedded as an image should be readable.
- b. The equation embedded as an image should be very clear and sharp. It should not be fuzziness.
- c. The equation embedded as an image should be bright and not dull (diminished).

Ques 6: What should be done if the Image is appearing outside the text area?

Ans: This can be ignored. It would be taken care during the production.

**Ques 7:** What should be done if the text (in the form of annotation) is appearing outside the text area?

**Ans:** The instructions mentioned in the annotations to be followed in the paper. The annotation and the tint should thereafter be removed.

Ques 8: What should be done if the we come across below mentioned situations -

- a. If the figure is inserted between two text sections and the figure partly disappears beneath the text or,
- b. If the text goes below the figure.

**Ans:** MS word has an in-built feature wherein the author can change the size and align the provided image.

This tool will appear on the right mouse button click on the picture.

The image in the word file will not exactly appear as per the PDF layout.

Refer below the screen shot.

Ques 9: How do we identify junk characters and how to correct it?

**Ans:** Whenever the author flows the content in the template, there is every possibility that some or the other character could appear as a box. This happens due to non-availability of the fonts in the system which is treated as junk character.

In order to insert the required symbol, follow the below mentioned steps:

1) Under the insert menu, select the option symbol.
